others, owners of the Empire Hotel at Olive and Beaumont streets, which was burned February 9, 1992, was reversed. Johnson was injured by jumping from the hotel, and based his suit upon the absence of fire escapes.

The defense was that William and Catherine Glilham, who conducted the hotel, were responsible, and not the owners of the property.

Judge Bland, who wrote the opinion, held that the law requires owners of hotels to maintain fire escapes, but that when the property in question was leased it was private property, and was converted into a hotel by the lessees, and that it was their duty to maintain fire escapes. The opinion was concurred in by Judges Goode and Revburn.

NOT A SKIN DISEASE.

It is natural to rub the spot that hurts, and when rheumatic pains are shooting through the joints and muscles and they are inflamed and sore, the sufferer is apt to turn to liniments and plasters for relief; and while such treatment may quiet the pain temporarily, no amount of rubbing or blistering can cure Rheumatism, because it is not a skin disease, but is in the blood and all through the system, and every time you are exposed to the same conditions that caused the first attack, you are going to have another, and Rheumatism will last just as long as the poison is in the blood, no matter what you apply externally. Too much acid in the blood is one cause of Rheumatism; stomach troubles, bad digestion, weak kidneys and torpid liver are other causes

which bring on this painful disease, because the blood becomes tainted with the poisonous matter which these organs fail to carry out of the system. Certain secret diseases will produce Rheumatism, and of all forms this is the most stubborn and severe, for it seems to affect every bone and muscle in the body. The blood is the medium by which the poisons and acids
